## STORIES THAT INSPIRE

After two years of abuse, when Fatima risked dying as her husband tried to strangle her, she came for us asking for help. Even then, she was begging not to send her back home. Her body was full of bruises, discolorations and marks. She was damaged inside out and asking for help hoping that we support her. **And she got it...**

### MAKHZOUMI FOUNDATION ON ITS 20<sup>TH</sup> ANNIVERSARY

draws upon the inspired energies of women from all walks of life and is dedicated to providing assistance to them through all its operating programs, from education and healthcare to development and relief.

Beating women is not a "family value"; it's a human rights abuse that is being ignored. At Makhzoumi Foundation, we try our best to support the victims

and we encourage them to report abuse. Violence in the home frequently swirls: what starts as a smack leads to severe beating and death.

**TODAY** Fatima is one of the lucky persons whom we are supporting: she escaped her abuser and is building a new life with her children in a special shelter.

*Dear HIGHLIGHTS readers, as you go through few of our success stories in every issue, please do not hesitate to join us in supporting the community with all available means.*
